

ProIndústria 2019's Concept: from Brazil to the World

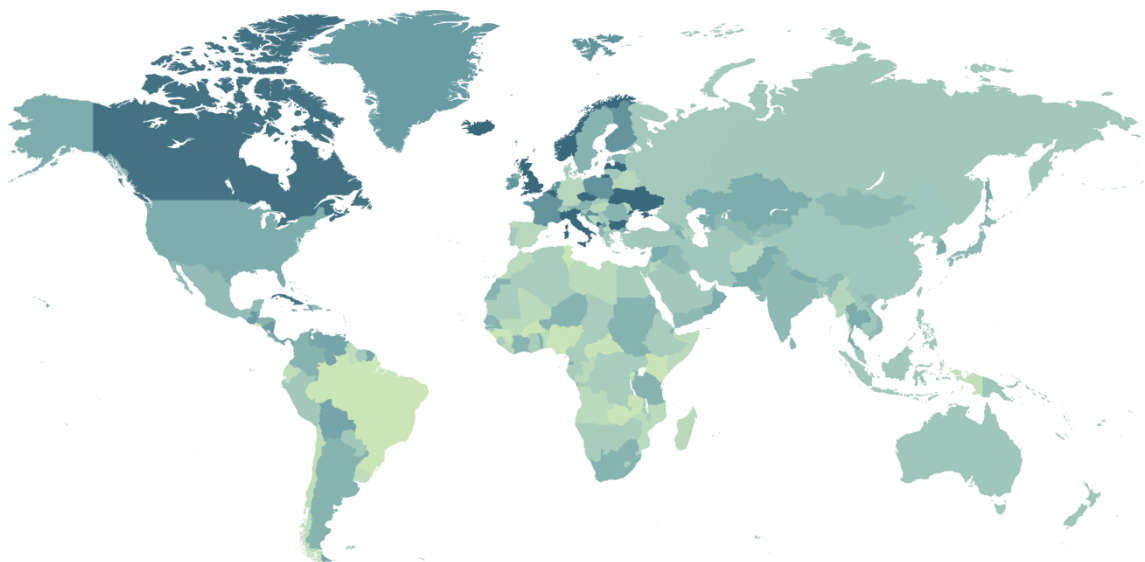

Roadmap for the Digital Industry

Business and Education Forum - Exhibition of IT Solutions and Industrial Automation

Smart Manufacturing, Advanced Manufacturing (USA, Brazil) & Industry 4.0 (Germany)

October 22-23 | Instituto Mauá de Tecnologia | São Caetano do Sul, SP – Brazil

13th Edition

The event has already happened in many ways and many stages and places, now we are showing the newest IT platforms like PLM Advanced, Industry 4.0, Advanced Manufacturing, Digital Factory and ERP on Cloud, the current state of MES and mainly the new devices that allow the **Digital Transformation** in the industries.

It is an event aiming at companies of all sizes, from retail to big industries and a big range of processes, manufacturing systems and information systems. You will be ready to understand how apply digital transformation in your company and how be more competitive in the digital age. You will understand '**The true value of the Digital Industry**'.

The ProIndústria 2019 is focused on:

- PLM in the new industrial organization
- New simulation-based platforms for product and factory design
- ERP in transformation to cloud platforms
- Clear view of both Advanced Manufacturing and Industry 4.0
- MES - Reorganizing Manufacturing for Industry 4.0
- Shop Floor 4.0 – Bar Code, RFID, Sensors, IIoT and PaaS (Product as a Service)
- Collaborative Machines & Robots
- Operational Excellence in the Digital Industry
- Cases & Benchmarking

ProIndústria 2019

22-23 OUTUBRO | 8H30 ÀS 17H30 | IMT - INSTITUTO MAUÁ DE TECNOLOGIA | SÃO CAETANO DO SUL, SP | 13ª EDIÇÃO

The event is supported by the experts of the best consulting and auditing offices and the best solution providers, independent consultants and market players of industrial software applications and current devices that take the digital transformation to small, middle, and large-sized companies in Brazil and worldwide. They are professional lecturers and executives of top companies that bring the best advice and the real cases of success and not success to understand the best way for you and your business to win in the digital transformation.

Evandro Gama PhD

Come and evaluate the true value of Digital Industry in the 13th edition of the ProIndústria event - October 22nd-23rd in São Caetano do Sul, SP
(One of the largest industrial regions in Brazil)

The **ProIndústria 2019** is advancing as the key business, education and solutions forum to discuss the new visions of the manufacturing world. It addresses several initiatives such as the Industrial Internet Consortium (IIC/USA), Industry 4.0 (Germany), Advanced Manufacturing (Brazil), and others. It brings an up-to-date view of current technologies, process improvement and empowerment of people to react to the current Brazilian and global economy. Its mission is to help companies and professionals identify changes in manufacturing environments to gain productivity and operational efficiency. The aim is to understand the new digital industry scenario to evolve and improve information related to products, processes, speed of delivery, capacity and flexibility of production to increase competitiveness in a new level of intelligence and efficiency.

Target Industries:

Discrete Control (Fabrication & Assembly), High Volume/Repetitive Control, Batch/Semi Process Control.

ProIndústria 2019

22-23 OUTUBRO | 8H30 ÀS 17H30 | IMT - INSTITUTO MAUÁ DE TECNOLOGIA | SÃO CAETANO DO SUL, SP | 13ª EDIÇÃO

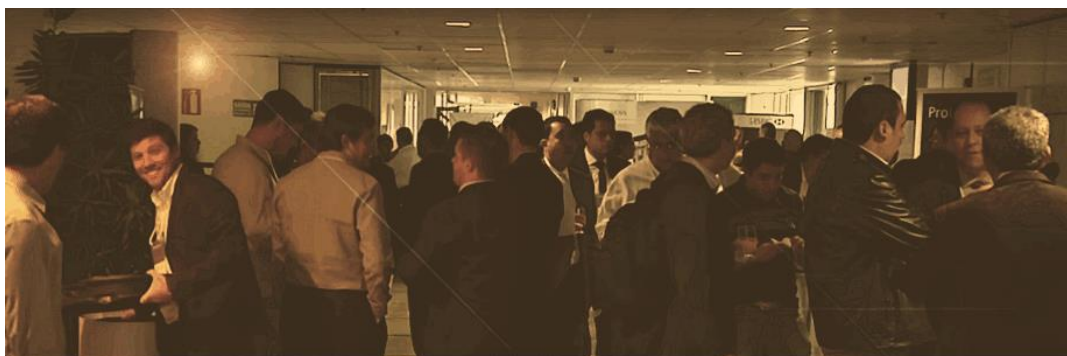

Target Audience: C-level, senior management, directors, managers, consultants, integrators, PLM, MES and ERP users, IT professionals and AT professionals, and other professionals from the areas of product engineering, requirements and specifications, process engineering, advanced engineering, programs and portfolio, manufacturing engineering, supply chain, commercial management, purchasing, services, academic and scientific environment, research and innovation, and others. Directors and owners of SMEs who want to take their businesses to the digital transformation of the industry.

About Cadware-Technology

Cadware-Technology promotes education and advising in solutions and integration of 3D CAD based systems, PLM, Digital Factory and Digital Manufacturing, MES/MOM, ERP, BPM and CMMI/SCAMPI. It organizes and coordinates the ProIndústria-Fórum and PLM-Summit events. It maintains the Cadware-Technology Education Program (Autodesk) for high level teaching in 3D CAD, PLM, Digital Factory Project and BIM. It is a business and education partner of MESA International (Manufacturing Enterprise Solutions Association), VDI Brazil (Brazil-Germany Engineers Association), SAE Brazil (Society of Mobility Engineers), IMT Research Center (Mauá Institute of Technology), ISD Brazil (CMMI Institute Partner), Ka Solution (SAP, Microsoft, Oracle, PM & Governance) and acts as Manufacturing Strategic Advisor for Autodesk software and services.

Evandro Gama PhD

Mechanical Production Engineer, chairman and advisor at Cadware-Technology. Promotes education and advice on Cloud-based CAD solutions, Product and Factory Project, PLM, Digital Factory and Simulation, AEC and BIM. Master in Production Engineering, Planning and Control of Production Systems by UFSCar. PhD in Mechanical Engineering - Planning, Simulation and Management of Manufacturing Systems by EESC/USP. Specialist professor for the professional training of IMT - Instituto Mauá de Tecnologia.
